

We're Rollin'...

We are fabricators. We make and repair conveyor belts that keep things moving. A short while back RK RUBBER had been deemed "essential." We stayed open and stayed busy and continued to manufacture rubber parts. At first, I was like "your darn right we need to stay open and keep producing" – it was kind of a badge of validation. Then I noted we were "open" just like the liquor store and ice-cream parlor. Hmmm...

So here we are a little later and hopefully smarter. It would appear we ALL are essential in keeping things moving. I'll keep RK RUBBER doing what it does best... you all do the same in your particular lanes and we'll all reap the benefits of our labor.
