125 Years of Changing Seasons

Spring has sprung and I am ok with the snow turning to rain. We welcome weather change around here and pretty soon the rumble of motorcycles will dominate our parking lot. When you've been around for as long as this company, "change" is nothing new.

In fact, we embrace it and make it our operating mind-set.

As an industry leader, we are constantly thinking of ways to best solve our customers rubber fabricating needs. Staying abreast of best practices is one way our craftsmen answer that challenge—every day. We will never cut corners or skimp with materials BUT during the process, if we discover a better way to get a job done... we'll make that change. Always learning and getting better, even at 125!

Dell Gutknecht
General Manager

The "Oversized Gasket" Experts

We are the go-to guys for the big ones. Need a 14 ft. gasket? We can do that!

Historical Fun Fact

You could find our listing and display ad in the 1954 Milwaukee Directory. The phone book was hard cover, bound, and felt like it weighed 10 pounds!
