MATERIAL HANDLING

Gaskets • Sleeves • Vulcanizing • Conveyor Belts • Fabrication • Die Cutting • Seals

I keep reminding myself that “there’s no time like the present.” It’s easy to get lost in the past; especially with all the reflecting we’ve been doing in this celebration year. And going down a wormhole like that is ok for a while BUT one must remember it’s better

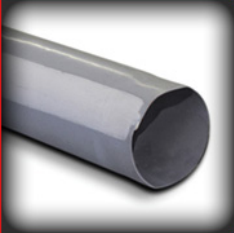

to just learn from the past and focus energy on moving forward.

As a company, we continue to dominate in the rubber fabrication arena. Our sleeves are the best in the industry... pick a material, any rubber substrate and watch us work it. Being mindful of that makes me proud of the present. I’m proud of both our high-craft reputation and the customer relationships we continue to foster.

Dell Gutknecht
General Manager

#1 In Rubber Sleeves

Rubber Sleeve Fabrication provides many benefits compared to fabric

- Higher durability
- Smooth interior surface
- Easy installation
- More cost-effective
- FDA-approved materials
- Made to any size and shape

125 YEARS AGO OUR FOUNDERS BEGAN THIS COMPANY BREWING BEER. WE THINK OF THEM EVERY DAY! "HAPPY 125TH ANNIVERSARY!"

Cheers to the years!

Historical Fun Fact

10 years ago, the number one morning radio team – the “Bob & Brian” show rolled in and did their broadcast from RK’s shop floor. For a brief moment, Dell contemplated changing careers as his voice hit the airways. He quickly returned to reality noting he’d miss the smell of vulcanized rubber way too much.
