**RK RUBBER®**

CONSTRUCTION / MINING

MATERIAL HANDLING

Gaskets • Sleeves • Vulcanizing • Conveyor Belts • Fabrication • Die Cutting • Seals

My calendar told me summer was over and autumn was the official temperate season here on Earth. That works out well seeing as it is also officially football season. Whatever your level of play, one thing for sure is executing the basics of blocking and tackling is paramount.

What an amazing segway for talking about conveyor belts...HA! For RK RUBBER, fabricating and servicing conveyor belts really is the "blocking and tackling" of the rubber industry. We execute on the most demanding level; best materials, quality end products, delivery and emergency service. Day in and day out... year after year operating at the top of our game. You can count on it.

Dell Gutknecht  
General Manager

# MAGNETIC SEPARATOR BELTS

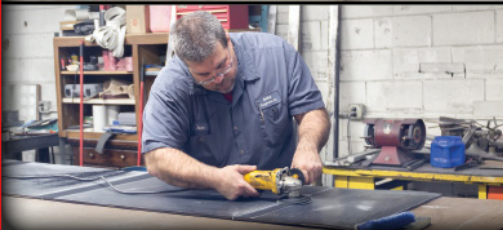

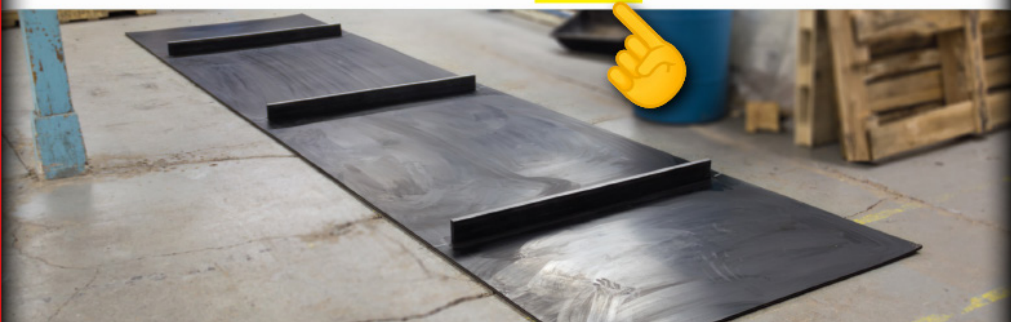

## WHAT WE CAN DO:

- Heavy duty rubber belt with hot vulcanized rubber cleats
- Heavy duty rubber belt with stainless steel angle iron cleats attached
- Perforated belts for attaching angle iron cleats/armor-cladding

Different belt compounds are available for various conveying conditions. Talk to your nearest RK Rubber team member for more information.

PRODUCTS WE CAN SHIP IN **WEEKS** NOT MONTHS:

On A Roll Since 1898!

Cheers to the years!

**EXPERIENCE = Solutions**
