MATERIAL HANDLING

Gaskets • Sleeves • Vulcanizing • Conveyor Belts • Fabrication • Die Cutting • Seals

Get ready for another change (again). This is the month we say hello to autumn. Speaking from my vantage point, it's a great season to see unfold. I'm a fan of the colors and the cooler temps. I'm also a fan of the return to the rhythm of life that comes after summer.

Now don't get me wrong, I enjoy the summer vibe and the outdoor activities we can take advantage of.

There's just something about kids going back to school,

daylight getting shorter and people/workers/industry looking to finish 4Q strong.

While that attitude is ever present at RK RUBBER, one can't help but feel that "get it done" positive energy hit another gear; be it business or personal. So keep your nose on the grind stone BUT look up every so often at the trees... they're going to be red and yellow and orange before you know it!

Dell Gutknecht
General Manager

We Go to Great Lengths...

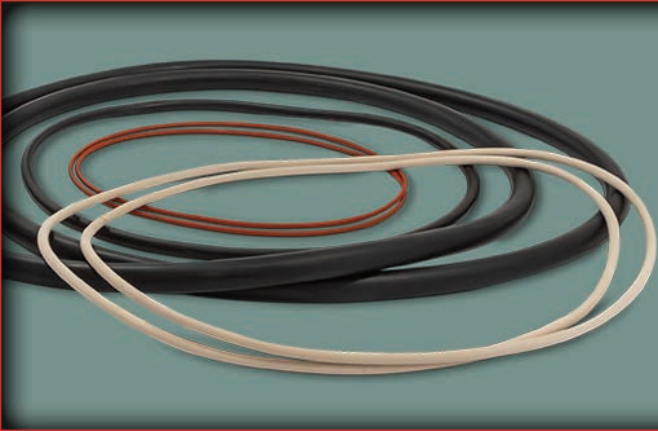

We fabricate sleeves to your custom needs; whatever your specs!

It's that time of year to "get smart"

"OK, EVERYBODY SING!... THE WHEELS ON THE CONVEYOR GO ROUND AND ROUND... ♪"

Back to school, industry conventions, or a lifelong learner – there's always room for more knowledge.

EXPERIENCE = Solutions
