CONSTRUCTION / MINING

MATERIAL HANDLING

Gaskets • Sleeves • Vulcanizing • Conveyor Belts • Fabrication • Die Cutting • Seals

We are gasket experts. We can fabricate a 14' OD gasket for a deep tunnel project on one side of the shop while die cutting multiple 1/8" thick intricate shaped gaskets on the other. You might say we're flexible.

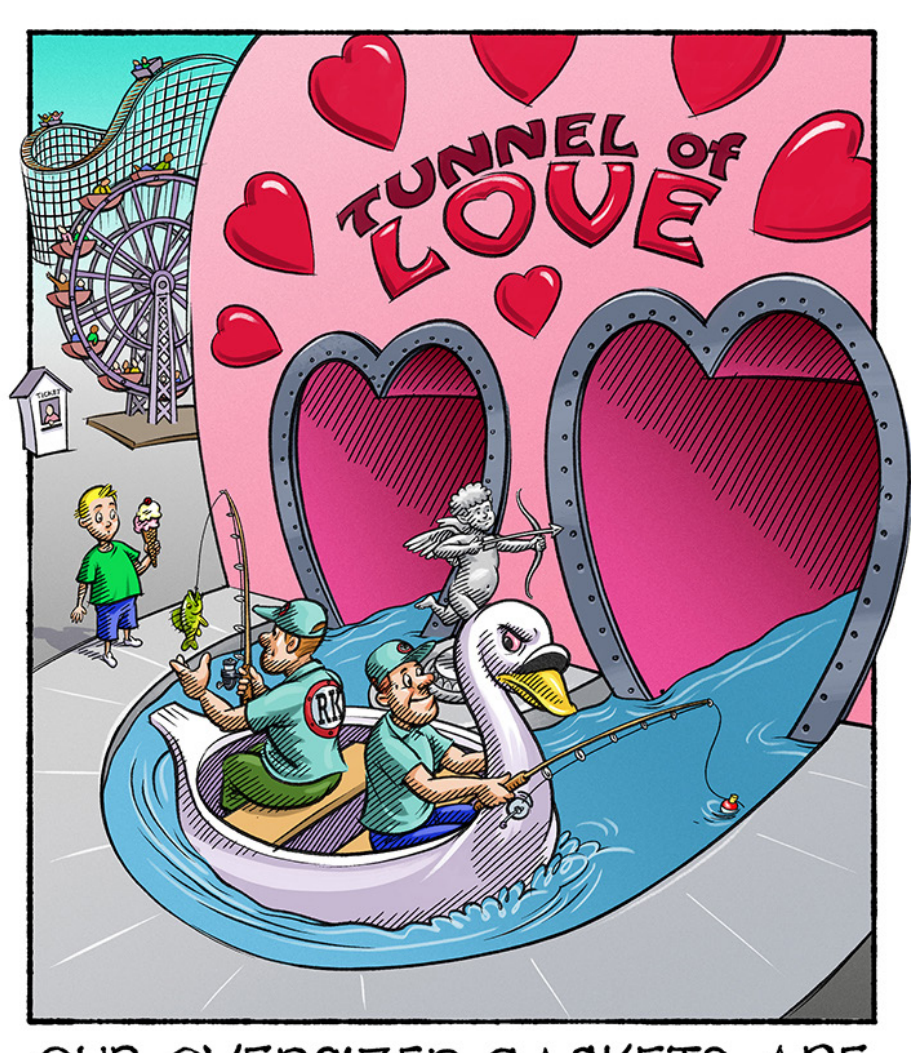

I'd also tell you I've never met a gasket I didn't like (as long as we produced it).

We are the choice of industry when it comes to custom seals. When you need a tight squeeze that won't spring a leak, give us a call. We'll spec the proper substrate and fabricate exactly what is needed to seal the deal.

Dell Gutknecht  
General Manager

## Happy Valetine's Day!

OUR OVERSIZED GASKETS ARE THE "CHOICE OF INDUSTRY" FOR ANY TUNNEL PROJECT!

Our expert craftsmen use a wide range of rubber materials to design the type of gaskets necessary for your project.
