RK RUBBER®

CONSTRUCTION / MINING

MATERIAL HANDLING

Gaskets • Sleeves • Vulcanizing • Conveyor Belts • Fabrication • Die Cutting • Seals

Ain't gonna lie... not a fan of extreme heat. And not just because it makes my favorite cold beverage disappear even faster, it's all the havoc it wreaks on everything.

Roads buckle, machinery breaks down, and it's exhausting (and dangerous) to work in the 100°+ heat.

The world however keeps spinning and things must get done. We know the importance of road construction and repair. We know the demands put on the machinery used in the heavy-duty construction trades, and we know that high quality and fast turnaround of fabricated rubber parts is paramount in keeping all things moving forward. Put us to task... especially when the heat is on... your business may depend on it!

Dell Gutknecht
General Manager

THAT TIME OF YEAR!

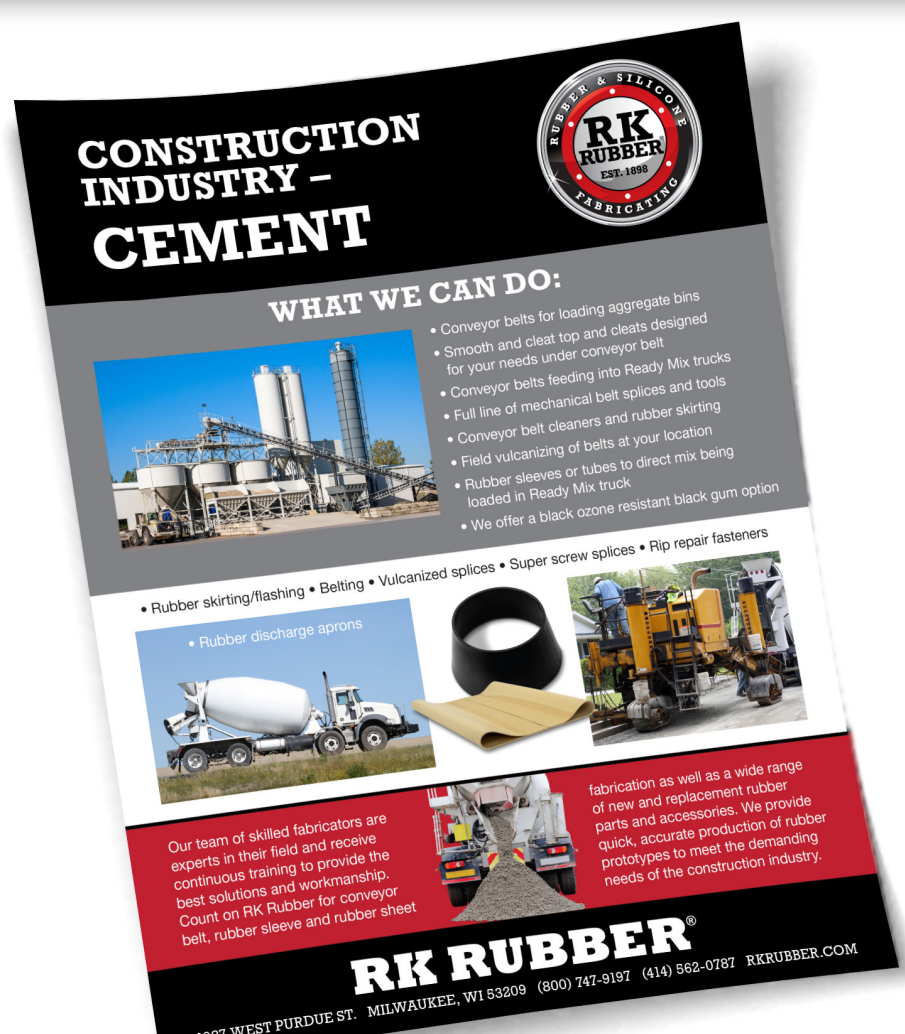

The 2026 National Work Zone Awareness Week theme is:

“Safe Actions Save Lives”
